Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-4, 11-14 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rodden, Jr. in view of Japanese No. 2001-39461.

Rodden, Jr. shows a pump body 11; discharge nozzle 17 rotatable about a central axis; trigger lever 14; pumping mechanism 12, 13; trigger cover 19 that rotates in a direction forward of the trigger lever until the frangible portions break off; protrusion 34; tabs 26, 27; and latches 35, 36. Rodden, Jr. lacks the trigger cover rotatable about the central axis and the trigger cover attached to the cap. Japanese No. 2001-39461 shows the trigger cover 12 that rotates about the central axis of the nozzle as seen in Figures 1 and 2 and the cover is attached to cap 11. It would have been obvious to one

Art Unit: 3754

of ordinary skill in the art to employ these details of the trigger cover and cap as taught by Japanese No. 2001-39461 on the device of Rodden, Jr. in order to facilitate easier movement of the trigger cover in and out of the "off" or locked position. The method follows from the apparatus and is also set forth throughout the references.

Allowable Subject Matter

4. Claims 5-9 and 15-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 4/4/2005 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
